

Technology & Quality

National Vinyl Products (NVP) has been manufacturing vinyl fence systems in the USA since 2004.

We take great pride in producing high quality, long-lasting and durable fence materials and back them with a lifetime warranty.

Product Manufacturing

NVP utilizes the latest technology to manufacture our vinyl fencing materials.

One of the processes we utilize is called 'co-extrusion', which creates two distinct layers in our fence materials. The outer layer is formulated to prevent weathering and hold up to the elements while the inner layer has additional strength properties.

White Privacy Fence

Raw Materials

- All ingredients are sourced in the USA
- NVP proprietary PVC formula that includes 8 micro-ingredients is blended at our own facility
- 100% virgin materials on all exposed surfaces
- Recycled vinyl fence and window material is utilized in some profiles and passes same rigorous testing as virgin materials

Quality Control

- Meets ASTM F-964 standards
- 3rd Party weatherability testing
- 3rd Party wind tunnel testing
